

## HOUSE PREPARATION FOR A FLEA TREATMENT

- Remove as many items from the floor of the rooms to be treated to allow access to as much floor area as possible.
- Move furniture from the edges of the room to allow access to the floor wall junctions.
- Thoroughly vacuum all carpets and rugs and clean all carpet-free floor areas. Pay particular attention to areas where pets may sleep or where the sun may heat an area of floor. Empty the vacuum cleaner directly into the outside rubbish bin to avoid recontamination.
- Make sure any pet bedding is washed and the beds are thoroughly cleaned.
- If you have a pet make sure it is being treated with an approved formulation, preferably via a vet.
- People and domestic pets must leave the rooms being treated and not be allowed to return for 3 - 4 hours.

## POST FLEA TREATMENT

- Stay out of the house for 3-4 hours depending on drying time.
- On return open windows to ventilate thoroughly when you return.
